## EDUCATION

### Drexel University

*Bachelor of Computer Science | GPA: 3.4  
Minor in Philosophy*

Philadelphia, PA  
September 2020 – Present

### University of Sheffield

*Study Abroad | Philosophy*

Sheffield, England  
September 2023 – Present

**Relevant Coursework:** Object-Oriented Programming, Advanced Programming Tools and Techniques, Mathematical Foundations of Computer Science, Data Structures, Machine Learning, Linear Engineering Systems

## EXPERIENCE

### Johnson & Johnson

*Regulatory IT*

**April 2023 – September 2023**

*Raritan, NJ*

- Collaborated with regulatory IT teams to implement new automation capabilities for health authority queries
- Evaluated potential vendors for architecture, innovation roadmap, and user interfaces during product demos
- Identified workflow improvement and automated offshore team's Excel calculations, reducing inconsistencies
- Created an interactive PowerPoint for operational metrics, highlighting key metrics and business value

### Bayada Home Health Care

*Systems Analyst*

**March 2022 – September 2022**

*Moorestown, NJ*

- Decommissioned and built remote servers using VMWare, merged changes to environment with GitLab
- Resolved tickets with Microsoft Exchange Admin Center, Exchange Management Console, Active Directory
- Scripted PowerShell scripts that read user data between databases and created reports for further analysis/updates
- Researched effective ways to automate the daily migration process for users that needed to be moved to the cloud

## PROJECTS

### GymHelper Mobile Application | *Swift, SwiftUI, XCode*

**October 2023 – Present**

- Utilizing SwiftUI within XCode to create an interactive iOS application
- Maintaining the style and ambience from the web application with a similar seamless design and user interface
- Researching methods to establish web and mobile application communication, while self-training backend development

### GymHelper Web Application | *HTML, CSS, JavaScript, React*

**August 2023 – Present**

- Developing a comprehensive gym website, incorporating features inspired by paid alternatives
- Utilizing the React framework for frontend development, focusing on an interactive user experience
- Constructed a custom macronutrient calculator, providing users with personalized results based on their input
- Implementing mock data within JavaScript files to facilitate user login testing and update status accordingly

### Online Portfolio | *HTML, CSS, GitHub Pages*

**September 2023 – October 2023**

- Developed a visually appealing website using HTML and CSS for content and styling
- Prioritized user interface, designed website with an emphasis on intuitive navigation and seamless experience
- Demonstrated effective project planning, defined milestones and objectives, resulting in an organized website
- Hosted the static website on GitHub Pages, ensuring global accessibility and version control

## TECHNICAL SKILLS

**Programming:** Python, JavaScript, Swift, C, PowerShell, Racket, MATLAB

**Operating Systems:** Microsoft Windows, macOS, iOS

**Development:** HTML5/CSS3, React, SwiftUI
